

Cybersecurity is **no joke**. Even on April Fools' Day.

Of 2024-25 National
Cybersecurity Alliance
report participants

61%

felt worried about
becoming a victim
of cybercrime

While fighting to protect yourself
online may feel like a fool's game,
there are **small steps** you can take to
make a **big difference**.

Passwords

- Create a new password for every account.
- Opt for passphrases.
- Use a password manager.

Multifactor Authentication

- Set up MFA for every account.
- Download the Duo Mobile app.
- Only approve MFA requests you initiated.

Software Updates

- Watch for update notifications.
- Install updates as soon as possible.
- Set up automatic updates.

Phishing

- Be suspicious.
- Take your time.
- Ask for help.
